Geometry: Position and Direction with Reasoning

| Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| POSITION, DIRECTION AND MOVEMENT |  |  |  |  |  |
| describe position, direction and movement, including half, quarter and | use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise) |  | describe positions on a 2-D grid as coordinates in the first quadrant | identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed | describe positions on the full coordinate grid (all four quadrants) |
|  |  |  | describe movements between positions as translations of a given unit to the left/right and up/down |  | draw and translate simple shapes on the coordinate plane, and reflect them in the axes. |
|  |  |  | plot specified points and draw sides to complete a given polygon |  |  |
| Working backwards <br> The shape below was turned three quarter of a full turn and ended up looking like this. <br> What did it look like when it started? (practical) | Working backwards <br> If I face forwards and turn three quarter turns clockwise then a quarter turn anti-clockwise describe my finishing position. | Working backwards <br> If I make the two opposite sides of a square 5 cm longer the new lengths of those sides are 27 cm . What was the size of my original square? <br> What is the name and size of my new shape? | Working backwards <br> Here are the co-ordinates of corners of a rectangle which has width of 5 . <br> $(7,3)$ and $(27,3)$ <br> What are the other two co-ordinates? | Working backwards <br> A square is translated 3 squares down and one square to the right. Three of the coordinates of the translated square are: $(3,6) \quad(8,11) \quad(8,6)$ <br> What are the co-ordinates of the original square? | Working backwards <br> Two triangles have the following co-ordinates: <br> Triangle A: $(3,5) \quad(7,5) \quad(4,7)$ <br> Triangle B: $(3,1)(7,1) \quad(4,3)$ <br> Describe the translation of triangle A to B and then from $B$ to $A$. |

Geometry: Position and Direction with Reasoning

| Order and arrange <br> combinations of <br> mathematical objects in <br> patterns and sequences |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :---: | :---: | :---: | :---: | :---: |
|  | What comes next? <br> OOCOOC <br> Explain why |  |  |  |  |  |  |  |  |  |
